THE PUBLIC SERVICE COMMISSION OF
SOUTH CAROLINA
DOCKET NO. 92-209-E - ORDER NO. 95-1384
JULY 27, 1995

| | | |
|---------------------------------|---|--------------------------|
| IN RE: Carolina Power & Light - |) | ORDER APPROVING COMMON |
| Integrated Resource Plan |) | SENSE MANUFACTURED HOME |
| (IRP). |) | PROGRAM AND REVISIONS TO |
| |) | RIDER RECD-79 |

This matter comes before the Public Service Commission of South Carolina (the Commission) on the request of Carolina Power & Light Company to implement a Common Sense Manufactured Home Program and to revise Rider RECD-79.

CP&L proposes to implement a Common Sense Manufactured Home Program to encourage new manufactured homes to be built to an enhanced energy efficiency standard and to utilize high efficiency heat pumps which will reduce energy consumption. According to CP&L's filing, the Common Sense Manufactured Home Program is designed to lower the energy costs of customers living in manufactured homes. Under the Common Sense Manufactured Home program, various segments of the manufactured home marketing distribution channel (manufacturers, retailers, salespersons) will be eligible to receive non-cash incentives collectively valued at up to \$155 for each Common Sense Manufactured Home sold. Also customers who purchase manufactured homes meeting the Common Sense Manufactured Home Program criteria will be eligible for CP&L's

Residential Service Energy Conservation Discount. The Common Sense Manufactured Home Program also provides for certain additional services that CP&L may provide to a builder/developer of a proposed development that will contain at least ten Common Sense Manufactured Homes.

CP&L offers that the Common Sense Manufactured Home Program will lower customers' bills, will reduce CP&L's peak load, will help offset the need for future generation facilities, will improve CP&L's load factor through better utilization of facilities, and will help defer the need for future rate increases. CP&L also states that the Common Sense Manufactured Home Program is consistent with its Integrated Resource Planning (IRP) criteria.

Along with its filing regarding the Common Sense Manufactured Home Program, CP&L also proposed revisions to its Residential Service Energy Conservation Discount Rider RECD-79 (Rider RECD-79). Rider RECD-79 provides a 5% discount off rates to residential customers whose homes meet certain thermal efficiency standards. The proposed revisions to Rider RECD-79 increase the thermal efficiency standards for new manufactured homes. CP&L offers that the revisions to Rider RECD-79 will encourage manufactured home purchasers to select more energy efficient manufactured homes. CP&L requests that Rider RECD-79 be redesignated Rider RECD-84 and further states that the new standards will only apply to new customers requesting Rider RECD-84.

By letter dated June 15, 1995, the Commission's Executive Director instructed CP&L to publish a prepared Notice of Filing in

newspapers of general circulation in the areas affected by the Application. CP&L complied with this instruction and submitted Affidavits of Publication to the Commission. No Protests or Petitions to Intervene were received by the Commission.

Upon consideration of this matter, the Commission believes that the Common Sense Manufactured Home Program and the revisions to Rider RECD-79 should be, and hereby are, approved.

IT IS THEREFORE ORDERED THAT:

1. CP&L's Common Sense Manufactured Home Program is approved.
2. The revisions increasing thermal efficiency standards for new manufactured homes in Rider RECD-79 are approved, and Rider RECD-79 is hereby redesignated Rider RECD-84.
3. CP&L shall file an original and ten (10) copies of the approved tariff changes within ten (10) days of receipt of this Order.
4. This Order shall remain in full force and effect until further Order of the Commission.

BY ORDER OF THE COMMISSION:

Chairman

ATTEST:

Executive Director
